

Introducing the **Adjustable Slip Section** for the SFlue brand; designed for use with a standard length to allow greater flexibility on site, where standard length configurations are not suitable for the required distance.

- ✓ Easy to install
- ✓ Aesthetical pleasing joint without the need for additional fixing such as screws or rivets
- ✓ Can be added to any preceeding length
- ✓ Blanket insulation supplied
- ✓ Includes a Retention Band - with adjustable lever toggle and bolt - offering a secure structural clamp between the slip section and standard length.
- ✓ Also available in Satin Black finish

NEWLY EXTENDED  
**15  
YEAR**  
WARRANTY
