IL is a twin wall gas vent system specifically designed for naturally aspirated gas appliances as well as radiant, LFE and ILFE fires.

Suitable for dry operation where the appliance operates under natural draught conditions and where the flue gas temperature does not exceed 250°C.

IL is a factory-made twin-wall gas vent system comprising of a range of straight pipe lengths, associated fittings, supports and accessories. It is constructed with an aluminium liner protected by an outer casing of galvanised steel.

An air gap between the outer casing and the inner lining insulates the vent and thus ensures a strong draft at the start of firing to minimise condensation. The resulting low external temperature under operating conditions permits installation with only 50mm clearance to combustible materials.

Lengths and fittings lock together positively to provide a strong rigid flue system and to ensure maximum ease of site assembly. Available in two diameters of 125mm and 150mm.

Typical Applications

- Atmospheric gas appliances up to 60kW
- Radiant gas fires
- Live fuel effect (LFE) fires
- Insert live fuel effect (ILFE) fires

IL Product Designations to BS EN 1856-1							
Standard Number	Diameter Range	Temperature Class	Pressure Class	D = Dry W = Wet	Corrosion Class	Material Specification Liner Grade 316L Liner Thickness 0.5	Sootfire Resistance G= Yes O= No
BS EN 1856-1	DN125 - DN150	T250	NI	D	Vm	LI1030	O50

Approvals

IL is CE and UKCA marked to BS EN 1856-1 under certificate numbers 0036 CPR 91455 and 0168 CPR 91455 respectively.

Quality

All components are manufactured under a Quality Management System, certificate No. FM557622, administered by British Standards in accordance with BS EN 9001:2015.

Construction

IL is constructed from a 0.4mm aluminium liner and a galvanised steel outer case. The construction incorporates a 6mm air insulated annulus to aid draught production and heat insulation. The ends feature a push and twist lock jointing system for ease of installation.

Application

Design for use on natural draught and naturally asperated gas appliances where the flue gas temperature does not exceed 250°C and where the flue gases do not condensate. IL is suitable for internal and can be used externally where no more than 3m of product is exposed. For appliances where the chimney operates under positive pressure and condensing applications or where the installation is external, please refer to our NOVA system.

Warranty

IL is backed by a comprehensive 5-year manufacturing defects warranty. The 5-year warranty is a measure of our confidence in the manufactured quality and installed reliability of our flue systems and gives added peace of mind for any installation.

PRINCIPAL DIMENSIONS

Size (internal diameter)	Maximum outside diameter
125mm (5in)	140mm (5 1/2in)
150mm (6in)	165mm (6 1/2in)

Partner with us, succeed together.

Need assistance with your residential or commercial flue project? Our team of experienced experts is here to help at every stage. We offer product selection and design assistance, conduct system surveys, and work with key installation partners to provide bespoke turnkey packages tailored to your needs.

INDIVIDUAL COMPONENTS

LENGTHS

Straight Lengths

Fixed straight lengths are available in five sizes: 152mm, 305mm, 457mm, 914mm and 1524mm (6in, 12in, 18in, 36in and 60in). Installed effective length is 38mm (1½in) less than stated actual length.

152mm (6in) lengths

Size (mm)	Code number
125 5in	0421305
150 6in	0421306

305mm (12in) lengths

Size (mm)	Code number
125 5in	0421205
150 6in	0421206

457mm (18in) lengths

Size (mm)	Code number
125 5in	0421105
150 6in	0421106

914mm (36in) lengths

Size (mm)	Code number
125 5in	0420305
150 6in	0420306

1524mm (60in) lengths

Size (mm)	Code number
125mm 5in	0420105
150mm 6in	0420106

Adjustable Lengths

Available in two sizes to ensure that an exact required vent length can be obtained.

305mm (12in) adjustable length

Size (mm)	Code number
125 5in	0421505
150 6in	0421506

457mm (18in) adjustable length

Size (mm)	Code number

150 6in	0421606

FITTINGS

Draughthood Connector

This component must be used to connect the system to an appliance spigot and also where the system is connected to a Transfer or Adaptor block for a BS EN 1858 Flue Block system. It cannot be used as a substitute for the Adaptor to Flue Liner.

Size (mm)	Code number
125 5in	0429305
150 6in	0429306

90° Adjustable Elbow

Provides variable angles or offset to be made but must not be used to exceed 45° from the vertical.

Size	Code number
125 5in	0422105
150 6in	0422106

Equal Tee

A Tee cap is supplied.

Size (mm)	Dimensions A B C	Code number
125 5in	241 96 102	0424305

Adaptor to flexible flue liner

Lower end of this all aluminium component connects to standard product, upper end fits over fibre cement flue liner. Also used to connect to flexible flue liner.

Size (mm)	Dimension A	Code number
125 5in	144	0471605
150 6in	169	0471606

Flexible liner to IL Connector

Designed to be secured into the top of a stainless steel flexible flue liner at the point where the liner exits an existing masonry, or similar chimney. Connection would normally be in the roof space, and the IL Gas Vent continues to termination in the normal manner.

Size (mm)	Code number
125 5in	0421005
150 6in	0421006

FIXINGS & SUPPORTS

Support Plate

Used to support vents at floor penetrations in conjunction with the Support Flange (supplied).

Size (mm)	Dimensions A* B**	Code number
125 5in	249 304	0403205
150 6in	270 304	0403206

KEPLER HPT is a push-fit twin wall insulated high pressure generator exhaust system suitable for high temperature / high pressure dry non-condensing applications. Supplied as standard with a 50mm high density insulated annulus. Due to its unique design, the KEPLER HPT generator system does not require expansion components, such as expansion bellows. Available in a range of sizes covering Ø80 - Ø600.

SUPRA PLUS® is a British built single wall chimney system designed specifically for today's modern high efficiency appliances that operate under positive pressure and condensing conditions.

Manufactured in 9 diameters ranging from 80mm to 350mm and consists of a range of lengths and fittings which simply push-fit together, and which are secured with a locking band. Seals are factory fitted and bonded for ease of installation. Available with a wide range of support components that cater for both lateral and vertical structural loading of the product. Extended range available from 400mm to 600mm.

NOVA® is a pre-fabricated, factory-made twin-wall, insulated stainless steel chimney system. Suitable for condensing and positive pressure applications and is specifically designed to meet the demands of the latest high-efficiency heating appliances as well as traditional gas and oil-fired combustion equipment. With its unique multi-barb twist-lock jointing system.

Manufactured in 8 internal diameters, ranging from 100mm to 355mm and consists of a wide range of components, together with a strong 16-barb twist lock jointing system, NOVA offers the ultimate in ease of installation and functionality. With its strong joint design, NOVA can achieve a maximum unsupported height of 3.0 metres above the last support (2.0 m for DN100), without the need for structural locking bands.

NOVA is fire resistance tested to BS EN 1366-13 and holds the following classification:

$EI 90 (o \rightarrow i) h_o v_e$

NOVA has also been fire resistance tested for a period of 4 hours under the integrity criteria of BS476 Part 20.

EUROPA PLUS® is a high pressure and high temperature chimney / exhaust system suitable for continuous operating temperatures of up to 600°C continuous and 750°C intermittent. Suitable for positive pressure systems up to 5000Pa (H1) and UL tested up to 14,945Pa.

It is offered as a double walled prefabricated 316L stainless steel chimney system, available in a range of insulation thickness to meet the most demanding applications. As standard, EUROPA PLUS incorporates a 25mm high performance insulated cavity, with the option to increase the cavity thickness to 50mm and 100mm for applications that demand critically controlled surface temperatures.

EUROPA PLUS® is fire resistance tested to the requirements of BS EN1366-13 up to 600mm:

$EI 180 (o \rightarrow i) h_o v_e$

Above 600mm EUROPA PLUS is fire resistance tested to the integrity and stability requirement of BS 476 Part 24 for a period of 4 hours.

About SFL

British manufacturer of flues & chimneys for residential & commercial applications for more than 50 years.

Commercial Solutions and Project Assistance

For large-scale installations in commercial buildings, we manufacture a range of flue systems with ease of install at the centre of your design. From complex header configurations to large-diameter stacks, we can accommodate almost every requirement for any application.

At SFL, we work with carefully selected installation partners to ensure your turnkey package is carried out on time within budget by seasoned professionals.

We're committed to offering industry-leading technical support services, throughout the whole process of design, manufacture, and supply of your upcoming project. Our experienced team are on hand to assist you at every stage of your project. From initial product selection to flue routing and calculations.

Residential Solutions

From wood burning & multi-fuel stoves to gas fires & oil boilers, our time-honoured brands of flues and chimneys have been a mainstay of domestic heating for decades. We work with a network of distribution partners providing high-quality residential flue and chimney components for easy installation. With fast delivery times and comprehensive product warranties, we ensure that your requirements are met with quality and reliability.

At the forefront of flue and chimney manufacturing and technology.

Since 1969 SFL have been leading the way in flue and chimney innovation and technology. Our portfolio of trusted chimney and flues brands are known throughout the world for their engineering excellence. We offer industry-leading technical support services throughout the whole process of design, manufacture, and supply for commercial, domestic, and industrial applications, with uncompromised customer service.

We are proud of our British built heritage at SFL. Our manufacturing centre is based in Barnstaple, Devon, UK, alongside our extensive R&D centre, ensuring continuous product development and testing to the latest Standards.

SFL is part of the Sphering group, Sphering is an EU market maker with renowned expertise in design, manufacturing and distribution of advanced air and flue care systems.

WeLab®

As a committed company determined to play an active role towards the environment and society, the Group has its own R&D centre: WeLab®. This facility has allowed the group to comply with the newest European standards (including the NZEB: nearly zero energy building) in terms of security and performance of appliances, but also to adopt a responsible innovation approach. With our WeLab®, we have developed test rigs based on minimum requirements in order to guarantee our clients the highest levels of security and performance.

SFL branded products are synonymous with the highest quality – it is this reputation that enables specifiers, contractors, and householders to use our products with total confidence.
