

SW

Economy single wall flue system

SW is suitable for oil and gas fired industrial/commercial warm air heating equipment where the flue gas temperature will not exceed 300°C and where the flue system operates under negative draught and dry conditions. SW is not suitable for pressure or condensing application and in this case our Supra product should be used.

Features:

- Simple crimp couplings
- Available in 9 diameters

Diameters:	100mm - 250mm
Construction:	Single Wall
Material:	Stainless steel

Flue Gas Temperatures:	T300
Pressure Capability:	40Pa (N1)
Mode of Operation:	Negative/Dry
Warranty:	5 Years
Environment:	Internal & external*

*Where external runs are required, they should be limited to no more than 3m. For greater runs, a twin wall insulated product should be used such as Nova or Sflue.
